## Professional Summary

Java Full Stack Developer with 3 years of experience designing, developing, and deploying scalable enterprise applications using Java, Spring Boot, and RESTful APIs. Skilled in building responsive front-end interfaces with React.js and Angular, and implementing microservices architecture with Docker, Kubernetes, and Kafka for high-throughput, event-driven systems. Experienced in CI/CD pipeline automation, cloud-native application development, and agile software delivery. Adept at writing clean, maintainable code and collaborating cross-functionally to deliver reliable, production-ready solutions on time.

## Technical Skills

**Languages:** C, C++, Java, Python, JavaScript, SQL

**Backend:** Spring Boot, Microservices, Spring MVC, Spring Security, Hibernate, REST APIs, Spring Cloud, Spring Data, Spring Webflux, OAuth 2.0, JWT, NodeJs

**Frontend:** React.js, Angular, Axios, HTML5, CSS3

**Tools:** Git, Maven, Sonar Cube, Postman, JIRA, IntelliJ IDEA, Eclipse, VS Code, Cursor, Codex

**DevOps/Cloud:** Docker, Kubernetes, Jenkins, GitHub Actions, AWS (EC2, S3, EKS, Lambda, IAM, RD ), Azure, GCP

**Testing:** Junit, Mockito, Jmeter

## Work Experience

### Spanidea Systems

June 2023 – Current

*Associate Software Engineer*

*Jaipur, Rajasthan*

- Engineered and maintained over 15 RESTful APIs using Java and Spring Boot, supporting applications with more than 10,000 monthly active users and reducing average API response time by 30% through code optimization and caching.
- Enhanced and optimized MySQL database schemas; developed and maintained advanced SQL queries to manage and analyze high-volume datasets (500,000+ records/month), achieving a 25% increase in query performance through strategic refactoring.
- Integrated 8+ third-party APIs and internal microservices, automating business workflows and reducing manual processing time by approximately 40%.
- Collaborated with frontend teams to deliver 10+ new features, contributing React.js components and JavaScript logic that enhanced user experience and decreased page load times by 20%.

### F13 Technologies

January 2022 – April 2022

*AWS Cloud Intern*

*Remote*

- Migrated 10+ applications to AWS, increasing operational efficiency by 25% and cutting infrastructure costs by 20%.
- Monitored and analyzed system performance with AWS CloudWatch, identifying and resolving issues that improved uptime by 15%.
- Resolved cloud-related incidents, minimizing service downtime to less than 1% annually and ensuring high availability.

## Projects

### Zuplio | *React.js, Spring Boot, RESTful APIs, MySQL*

- Developed a full-stack online food ordering application using React.js (frontend) and Spring Boot (backend), increasing user satisfaction scores by 20%.
- Implemented RESTful APIs in Spring Boot, enabling real-time order processing and supporting over 100+ concurrent users.
- Designed and managed a MySQL database, optimizing storage and retrieval for 100+ user accounts, 500+ orders, and 50+ menu items.
- Collaborated with a team to deploy and maintain the application, achieving 99% uptime and scaling infrastructure to handle a 20% growth in user engagement.

### Hotel Management System | *Core Java(Swing, AWT), MySQL, IntelliJ Idea*

- Rolled out a hotel management application utilizing Java Swing and AWT, enabling management of 50+ rooms and 20+ drivers, which resulted in a reduction in manual tracking errors.
- Engineered a JFrame-based GUI streamlining hotel operations, encompassing real-time room assignments, driver allocation, guest checkouts, and automated status updates, reducing front desk task completion times by 30%.
- Leveraged object-oriented programming techniques, including inheritance and polymorphism, to structure multiple account types and enhance MySQL database efficiency, leading to a 25% boost in data retrieval speed.

## Education

### MBM University

*Bachelor of Engineering in Electronics and Computer(2023)*

*Jodhpur, Rajasthan — CGPA: 8.23/10*
